ERQ v2.3.1 Offers New RACF Administration Reports, Panels and Commands

NAPLES, FL (February 2010) – Advanced Software Products Group, Inc., developer of one of the leading RACF administration and reporting software solutions, is pleased to announce the GA release of ERQ v2.3.1.

This highly anticipated release of ERQ includes new screen level help panels and a new summary report which shows RACF userid's that have CICS OPIDs. Also, included in this release is a new Password Expire/Resume Report command, allowing the RACF Administrator to generate RESUME commands for expired/revoked RACF userid's.

ERQ [Easy RACF Query] provides comprehensive, yet simple, on-line RACF administration and reporting. Easily CLONE, DELETE, LIST and/or REPLICATE profiles with a single key stroke. ERQ offers a fully customizable ISPF interface for flexible and efficient RACF Administration, as well as easy-to-use Programming Services for writing custom RACF application/procedures using a straightforward API interface. Users can easily issue commands or generate reports with little or no training.

As a provider of innovative data center solutions for nearly 25 years, Advanced Software Products Group, Inc. remains a pioneer in leading edge corporate data center performance by providing specific solutions in the areas of Data Security, Capacity Planning, Storage Administration, CICS Productivity, and Systems Productivity.
